COMMENTS

I oppose the Beatty Rd Tram Rd bridge. It will create more noise, safety issues with no limit as to type of vehicle having access, safety issues as it will connect a high crime neighborhood directly to our subdivision of Whitehall, more foot traffic in the area with the probability of bus stops along Tram, probable flooding (added flooding) to an already saturated area, property values will plummet as well. I have lived in Whitehall for 41 years. My home is paid for, I planned to live here until no longer able. I do not want to have to relocate. I am afraid that this bridge will force me out of my home, and at a great loss as I have recently renovated my home. Please give real consideration to eliminating

this bridge as part of your proposal,

I am also concerned about the elimination of exits on Bush River Rd. Small businesses will be forced to close creating blight and more crime, I have empathy for business owners who have many years established their business and made their living in this area. Eliminating this exit will directly impact all who live in the area as a result.

Good presentation. People at boards
were very helpful.

I very much like what I see.

Glad to see the ~~light~~ tightness/congestion
dealt with. ~~the~~ Glad to hear that old
bridges will be moved/upgraded.

The direct lanes to I-20 and I-26
south is a great method of moving traffic
the three lane enlargement of I-26 is so
much needed.

The upgrade of ~~the~~ Harbison will be a great
help.

Thank you!

COMMENTS

- ① For the 3-5 million dollars this TRAM Rd to Beatty Rd bridge will cost people can drive around. Use this money some where else.
- ② We on Tram Rd feel it will increase traffic that this road is not ment to handle, it will decrease property values that the DOT should guarantee payment on if this happens.
- ③ It is the Opinion that this connection will make it easier for a bad Element of the Broad River Rd AREA to have easy access to this neighborhood.
- ④ Many people run and walk dogs on this Road and more traffic increases the chance of someone getting killed in which case the team that came up with this Idea should be opened to LAW suits. This road doesn't even have sidewalks we don't need more Traffic

- ⑤ This Road is a narrow, hilly, and curvy Road that does Not need more traffic.
- ⑥ People that came up with this Idea must be on crack! Could it be the same people that designed Malfunction Junction?

Thanks. Very informative video

Will there be truck restrictions on I-26 from mile marker 85 thru this entire project. If not, why not?

When trucks (18 wheels) are allowed 3 abreast, like now, they effectively block the highway. As you're aware I-85 in Greenville has them, but now I-26 does not.

Thank you.

COMMENTS

I'm impressed with most of the modifications to malfunction junction and feel that they will improve traffic flow. However, I do strongly object to the construction of a connector bridge over I-26 from Tram Road to Beatty Road. I believe there is no relationship between the primary purpose of the overall project and that bridge. Access from one side to the other is available at Piney Grove and St. Andrews. To save someone 5 minutes crossing the interstate would not warrant the millions of dollars to build this bridge. I would like someone to provide the justification for the bridge.

*As you move and alter Jamil Road,
please also add a pedestrian /bike lane.*

*Residents in the area, including apartments,
Williamsburg West neighborhood, Whitehall
neighborhood, and more, need a way to
travel by foot and bike. This type of travel
could also relieve some road congestion.*

*Also, a noise barrier along the Jamil Road area
is necessary since the surroundings are very
residential.*

COMMENTS

I am adamantly opposed to the Trum Rd/Beaty Rd connecting bridge.

- 1.) No DOT Representative can explain how this bridge is of benefit to the two primary objectives of the overall project (Reduce congestion & Improve mobility) and I have asked five and will continue to ask.
2. Increased traffic on Trum (and probably Beaty Rd) will cause a dramatic increase in safety, totally unacceptable.
3. Whitehall is still recovering from Oct '15 and does not need negative impact of this project.

Thank you

Thomas E. Comer

COMMENTS

The proposal to add a bridge from Beatty to
Tram would be devastating to the Whitehall
neighborhood. This neighborhood is just now
recovering from the 2015 flood and this proposal
adds concerns about additional flooding.
Our homes have decreased in property value
because of the flooding and this proposal would
further decrease the value of homes. Our neighborhood
currently has many issues with speeding and
this proposal adds even more hazardous traffic concerns
I see no advantage to either side to build this
bridge. It serves no purpose!

COMMENTS

My comments are about the proposed bridge linking Tram Road and Beatty Road. In August or September of 2017, the DOT had a presentation showing all of the possible changes for the Carolina Crossroads project.

1. Out of the 30 to 40 proposals, the Tram-Beatty bridge was not one of the proposals. Most of the Whitehall residents did not know of this bridge proposal until the week of 13 August. To sneak this in at the eleventh hour is not right or fair.
2. At a DOT presentation to the Whitehall residents on 21 August, it was stated that the distance between the St. Andrews Road bridge and the Piney Grove Road bridge was the longest distance without a crossing over the interstate in the project. The distance between these two bridges has not changed in 60 years. If it is so important now to have this crossing, why was it not presented in the August 2017 meeting at Seven Oaks Elementary.
3. This proposed bridge will greatly increase the traffic on Tram Road. Tram Road is dangerous in that there are sharp curves, large elevation changes in short distances, and many blind driveways. If you had to build Tram exactly as it is today, you could not get it permitted. Increasing the traffic will increase accidents, decrease property values, and affect the neighborhood in a negative way. If this is built, within five years there will be a great need to improve Tram by widening, straightening out sharp curves, taking out large hills. This will destroy Whitehall.

Other comments on Carolina Crossroads:

1. The widening of I-26 will take more green space and pave it. In Whitehall, we already have flooding problems that it seems have no solution. Increasing the paved areas, especially in the mile east of Piney Grove Road, will increase the water runoff rate, increasing the flooding in Whitehall during heavy rains. What is being done to prevent the rate of water runoff into the Whitehall neighborhood.

Thank you,

J. Brell Foster PE

Behind our property there is drainage and currently the plan doesn't show drainage addition. The new right of way for Lake Murray may take more trees away, but that would likely increase the view of the interstate from our property. PLEASE leave as many trees as possible to keep the noise down as well as keep our view clean.

Noise advisory committee hasn't met in 2 years! Not good for transparency in the government!

- Tram Road / Beatty Road not feasible, not needed and not an improvement. "A bridge to nowhere" which can cause more accidents, damage. Seen as arbitrarily done at the last minute. (with federal/state funding) Not seen on last public hearing nor was it mentioned.

- By law, there needs to be decision making to provide more public transportation and such as carpool ^{high} density lanes, bicycle paths (ie on Bridge Tram/Beatty Rd), other means of transportation. This is not evident in the decisions made and presented. Need a high mass transportation score + walkability score.

- Would like transparency as to the meetings that SCDOT has had with local governments such as Richland County, Lexington County, City of

COMMENTS

(1) I fully support the broad concepts of Alternative I - without a doubt the I-26 Corridor situation demands sweeping improvements. I like the concept of collector distributor lanes.

(2) I strongly oppose the proposed connector bridge over I-26 to connect Tram Rd with Beatty Rd.

(A) This seems like a last minute add-on and has not been previously presented as an idea for discussion.

(B) It seems unnecessary/unneeded. If emergency vehicles need to move more easily around on Jamil Rd and Fernandina Rds, then devote the money to improving those roads. Improve the intersection at Jamil Rd and Piney Grove Rd to eliminate traffic backups (adding a right turn lane from Jamil onto Piney Grove would be a big help).

(OVER)

NOTE: Information provided, including name and address, will be published and is subject to disclosure under the Freedom of Information Act.

(C) Tram Road and roads that feed off of it do not need additional traffic. Apparently there has not been a study done on what additional traffic impact there will be. But the connector will only add traffic to Tram Rd. It will become one more shortcut route - traffic will come from St Andrews Rd. More traffic will be added to other residential streets such as Nottingham Rd and Brookshire Rds as drivers come through to get to Tram and then cross over I-26. Sidney Rd. will see significant increase in traffic.

(D) Whitehall is an urban/suburban neighborhood. It is one of the early large subdivisions. While not an exclusive, upscale area, it is truly residential. The homeowners take pride in yards and homes. Tram Rd itself is completely residential. There is no good reason to destroy property values of so many homes. This residential street is narrow, it winds over and down hills, and is lined with nice looking yards. Near the intersection with Jamil - in those woods, deer often cross Tram Rd. Many geese saunter across Tram Rd daily. Please do not destroy the Whitehall neighborhood with this ~~unnecessary~~ connector bridge. The "connection" is not not wanted or needed.

COMMENTS

I am VEHEMENTLY opposed to the bridge connecting Tram and Bathy Roads. It will only serve as a speedway through Whitthall, a residential neighborhood with roads not designed to accommodate the traffic. It will become a quality of life issue. The Foundation for which I manage, oversees Letzia's Care Connection at the corner of Tram & St. Andrews Roads. It will highly impact the entrance off Tram Rd.

Additionally, The turbine interchange is located in unincorporated Lex Co & Richland County. It will have no ownership to design a landscape and maintain it. This turbine Interchange is Columbia's Cooper River Bridge. It should be designed in a way that deaestification efforts can easily be planned and maintained.

This project seems like a huge expenditure of money to solve traffic problems that only seem to exist during rush hours. Couldn't 1.4 billion be spread out more evenly to improve more areas in the state than just this corridor? Just a suggestion

I-26 / St Andrews Rd

1. Landscaping of the I-26/I-20 interchange should be a priority. The area does not fall within a municipality and should be state supported.

2. I do not support the bridge connector from Team Rd. to Beatty Rd. Team Rd. is NOT designed to support the proposed traffic flow that will result and the Whitehall area will be negatively impacted.

3. All efforts should be made to coordinate design to support the completion of the Lower Saluda Greenway Plan.

COMMENTS

I am opposed to the bridge connecting Tram Rd. to Beatty Road as it will bring more through traffic into a residential area. It will also give a direct link from the high-crime Broad River Road area to a low-crime residential area.

② We need noise barriers. Woodland Hills currently hears too much interstate noise.

COMMENTS

I think the Beatty / Tram Bridge will bring too much traffic into the Whitehall subdivision. This is not a major thoroughfare now but is a road thru a neighborhood.

This bridge will eventually carry high volume of traffic directly into a quiet neighborhood. As it stands now, there are easy crossings to Broad River Rd from HARBISON / IRMO, Piney Grove, ST. ANDREWS RD (which has 2 routes incl. the Browning Rd Loop). I do NOT think this bridge is a good idea at all.

Love the idea of feeder lanes though from I interstate to the other

Concerns: The impact of 5-7 yr of construction on the daily life of Whitehall residents.

The impact on the property values of Whitehall neighborhood

There is no plan to date for the impact on Tram Rd as a result of the Beatty/Tram connector.

The St. Andrews Rd interchange is modeled after 378@ Lex. Medical Center, which has not been^{as} effective as I would have expected.

We need to continue to see updates as the project progresses. There seem to be more questions than answers at this point in time.

① I am opposed to the bridge connecting Beatty Rd. to Tram Rd. This will increase through traffic in a residential area, which is a safety concern. It connects a high-crime area to a low-crime residential area. No bridge!

② I welcome sound barriers, as my neighborhood, Woodland Hills, is between I-20 + I-26 --- very noisy! The higher the barrier, the better so that it will give maximum relief to those in the interior of Woodland Hills where it is still very loud.

③ I welcome your acquisition of the now-closed club on Berryhill Rd. as well as the Red Roof Inn on Berryhill Rd.

COMMENTS

I like the bridge connecting Betty Rd and Tram. I will
be able to avoid traffic at Piney Grove and St Andrews Rd
when driving to Irmo.

My concerns are about changes to Gale Drive. My parents own
property on Luster Lane and Morninghill Drive. No sound barrier
is planned for along Gale Dr. Currently the highway noise is so
loud you can't have a conversation outside. A lot of traffic noise
is heard in inside - trucks braking, sirens, general traffic
noises. This will completely ruin any outdoor activities at
th

COMMENTS

We request a review to see if there
is a possibility of a road to replace Gale
Drive which now connects three streets,
Morningside, Luster Lane and Fairhaven Dr.
This would be much better than having the
three roads deadend when the project is
completed.

Thank You

COMMENTS

I am on the DOT Noise Abatement committee and has not been contacted about any meetings concerning this matter. I was told by DOT personnel that we would possibly be given devices that measure noise and attach them to our home or inside our homes to get a True representation of noise level. The residents of Quail Hollow, The Gates at Quail Hollow, and Quail Hollow Village are very concerned about the current and future noises. SCDOT should consider the prohibition of the big trucks using "Jack Brakes" anywhere around the greater Columbia Area.

COMMENTS

While the latest attempt to correct the boondoggle (to use a more polite term) that is Malfunction Junction and I-26 traffic mess is admirable, there is one aspect of it that I find unconscionable: the overpass from Tram Rd. to Beatty Rd. Access between the two frontage roads now is not difficult and adjustments to the plan to the Piney Grove and St. Andrews Rd. interchanges could prevent any further problem. Tram Rd is a curvy, hilly residential road that already transfers many vehicles per day. Providing access that doesn't involve interstate exchange traffic (as this proposal would do) will only increase the traffic on Tram. This is the proverbial night mare waiting to happen. School buses drive children on Tram - how will increased traffic make

bus stops safer? What changes to Tram (bumps, humps, stop signs etc.) are planned to slow traffic on Tram? And how does DOT plan to protect residents' investments in their property?

It is my understanding that no impact studies have been done vis-à-vis Tram Rd. and these issues. This is beyond negligent.

In addition, access from Tram to Jamil is not slated for improvement. As it is currently, a hill on the Piney Grove Rd. side of Jamil tops out right at Tram, making it an already dangerous intersection. The plans I have seen ~~do~~ not appear to address this.

Bringing the overpass to intersect at Tram where it is planned would further cause more safety issues at Sidney Rd and to the ~~the~~ entrance to the Cottages at Whitehall.

In short (aren't you glad?) the bridge idea needs to go away. Or move somewhere else.

Don't make Tram Road residents and the rest of Whitehall become the sacrificial lambs to this project. Find a better way. Let the "better angels of your nature" prevail. You seem to have a decent idea for the rest of the project (so I won't spit when I hear the name Wilbur Smith anymore) so go for broke and fix the whole thing. You can do it.

I most definitely disapprove this plan !!!

I believe it will bring property values down in my Whitcomb neighborhood - esp Tram Rd. I feel that had we homeowners known about this earlier we would have protested earlier. We feel like it was planned without our knowledge + it looks like to me it is a done deal! The same highway dept. that planned the major intersection has planned this too. I have not been convinced that that this plan is for the good of the people

COMMENTS

I find it interesting that this project is mostly negatively impacting an area of ±80% lower income, minority ~~popu~~ populated area. I also think this is garbage that public hearings are timed so most people are not able to attend.

This is not going to help anyone in the Bush River area and no one at this hearing is listening to our concerns. The area cannot handle the volume of traffic this project proposes.

Remove from the Project the Overpass from Tram Road to Beatty Road. This overpass will increase traffic on Tram Road. Tram Road is already a very dangerous road. Tram Road is narrow and winding and has many pedestrians. There is no sidewalk on Tram Road, which makes pedestrian traffic dangerous. Please do not build an overpass to connect Tram and Beatty Roads.

Among our concerns are - (1) access to our street by emergency service vehicles, e.g. fire & ambulance and ease of access from our neighborhood to Columbia area hospitals. (2) A second concern is noise. Please give serious consideration to building a noise abatement wall along I-20 where Gale Dr. now is but will no longer be. I-20 traffic lanes will be much closer to homes on Morninghill Drive, Luster Lane, and Fairview Dr as well as homes in the Belmont Acres neighborhood. If a wall is not possible, consider planting trees to at least partially muffle noise.

This is a mammoth problem that now has a reasonable plan to correct the existing situation. I am impressed with the direction of ^{lane} approaches for the principal junction (I-20/I-26) and its connectors. The proposed changes avoid many problematic environmental areas and neighborhoods. The careful global examination appears to alter traffic flows effectively for many years to come. Thanks to everyone at DOT who has been involved.

I am opposed to the proposed new bridge to Tran Rd. It will change the complexion of the White Hall community and will bleed over to Williamsburg West where I reside. In addition traffic on I-95 will grow exponentially. I-95 & I-26 is our only way to visit our neighborhood.
It sounds like a very bad idea?
Thank you

This proposed change will HELP a great deal!
I hope that SCDOT will continue to work to get RAI
approved ASAP & get construction going soon. This improvement
is decades overdue here in the Midlands & I think it will
help w/ improving safety on the roads in our area.

COMMENTS

I am really impressed with the proposed changes. Looks as if a lot of thought was put into getting us the best access to all areas involved. Safety is a big concern for me right now and I would love to see the statistics in the next years upon completion of the rate of accident reduction. Good job.

We all know this change is greatly needed and green spaces need to also be addressed for welcoming and beautification on the. Please address the convenience to the public while the project is under construction, make encouragement of St Andrews Rd traffic would narrow the interchange on 378 and I-26 can you give traffic stats on accidents at the junction and when did you see positive traffic flow w/o major accidents.

THANK YOU FOR A WELL-DEVELOPED PRESENTATION.

GLAD THAT THE TURBINE ALTERNATIVE FOR I-20/I-26 INTERSECTION WAS SELECTED.

APPEARS THAT MY #1 CONCERN, WEAVING OF TRAFFIC THAT ENTERS I-26 WEST FROM I-20 WEST, HAS BEEN MINIMIZED/ELIMINATED.

AS LONG AS THIS PROJECT WILL BE, PLEASE DO NOT ATTEMPT TO "SAVE PENNIES" WHEN THE REASONABLY MORE EXPENSIVE SOLUTION WILL LIKELY HAVE LONGER-TERM BENEFITS, PARTICULARLY BEING ABLE TO MAINTAIN SPEED + DO SO SAFELY!

COMMENTS

Tram Road to Beatty road may not be useful as the process of utilizing the ramps and merging on to either Jamil Rd. or Fernandina Rd. will increase travel time to either. We are also concerned about the length of time for construction and the impact of detours on our commute. We would to continue receiving updates as the project moves forward.

COMMENTS

The proposed bridge at Tram/Beatty roads is going to have a poor impact on our community. There is a very high crime rate in the Beatty Rd and Broad River Rd areas that we do not want connected to our neighborhood. There are many failing and closed businesses on Fernandina Rd and no need for a new bridge there. Traffic is not that congested along St Andrews/Piney Grove Roads to necessitate this bridge. We are already going to suffer lowered property values being even closer to 26 than we already are and don't want the bridge connecting Beatty and Tram Roads

COMMENTS

I oppose the Tram Road - Beatty Road Connector
because we do not need to go from Whitehall towards
Broad River Road or to Costco. We can access these
areas by going up Jamel Road to Piney Grove Road.
We do need a right turn lane on Jamel at Piney
Grove Road.

I am impressed with layering the roadways
to accommodate traffic & having motorists decide
well ahead of time which choices to make -
26 or 20 or 126.

COMMENTS

I want to express my disapproval of the Tram Rd-Beatty Rd Connector Bridge over I-26. Tram Rd is ~~at~~ the heart of a nice, quiet neighborhood - Whitehall. We moved to Whitehall 4 1/2 years ago after living over 35 years in Smo. Tram Rd is a narrow, winding, hilly road that is completely residential from one end to the other. By making it a cutthrough from Broad River Rd to St Andrews Rd, you will be destroying our neighborhood and devaluing our property greatly. People who live in Whitehall, especially on or near Tram will be adversely affected by the increased traffic, including ~~to~~ cars, large trucks, a possibly city buses in the future. Walkers, joggers, children ~~walking~~ walking on the school bus, our neighborhood wildlife (geese + deer) will be in danger by this traffic. Please do not build this bridge.

I strongly oppose the Tram Rd / Beaty Rd
Bridge & ask that it be removed from the proposals
for Carolina Crossroads improvements for the various
reasons: 1) Flooding Concerns 2) Hazardous traffic conditions
3) Decrease to Property Values 4) Increased Noise

The money to be used for this bridge would be much
better spent in other areas of our community for improvement.

Thank you. Chip

Why will this project take ten years? (this is what we were told at another meeting) What provisions are being made to insulate nearby homeowners both during and after construction? already the noise + dirt from I26 is unhealthy. Stoops creek now is expected to provide a path for rain runoff from the entire St Andrews area way up to Piney Grove Rd. NO improvement in that system has been made in at least forty years during which time the population and building rate has expanded ten-fold - including the highway ^{but not the} cut-off system. It simply dumps everything into the obsolete, existing inadequate and crumbling infrastructure. Either make the drainage infrastructure adequate to the changed conditions, or condemn and

COMMENTS OPPOSE!! TRAM RD / BEATTY ROAD BRIDGE
① SAFETY ISSUES REGARDING CHILDREN ON THIS NARROW ROAD
② PROPERTY VALUES WILL FLUMMAT.
③ SCDOT REPRESENTATIVE STATED TRAFFIC WOULD NOT INCREASE.
WHY BUILD A BRIDGE?
④ TRAFFIC IS ALREADY CONGESTED AT TRAM & ST. ANDREWS.
MORE TRAFFIC COMING FROM BEATTY ROAD WOULD GREATLY INCREASE
THE BACK UPS & DELAYS.
⑤ MORE FLOODING ISSUES THAT HAVE NEVER OR
WILL EVER BE CORRECTED.

COMMENTS Concerns

1. Height of road structures
2. Noise from traffic - what is being done to reduce noise. What soundproof barriers will be put up
3. Most important - Water DRAINAGE and FLOOD CONTROL

8-10 Houses were flooded on Woodland Hills East - during Oct. flood - 3 years ago. — This project will bring more drainage & flooding. What is being done about flooding on Stoops Creek? Please call me

Mary Teague (803) 798-3289

or (803) 315-7059 interested in selling my house

on Woodland Hills East to the Highway Department

NOTE: Information provided, including name and address, will be published and is subject to disclosure under the Freedom of Information Act.

To Whom It May Concern:

For over fifty years, I have been a resident of White Hall. I have watched this area grow to its maximum potential.

I no longer have children who ride the school bus to and from Tram Road. However, I see children get on and off the bus and worry about the traffic as it is now. I cannot imagine how dangerous it would be with the increased amount of traffic that this project would bring.

My driveway is on Tram Road and the amount of traffic would increase the danger for everyone on Tram Road.

Please consider the above statements when making your decision concerning this project.

Thank You,

Ann Hodges

COMMENTS

I live on Tram Rd. and do not support construction of the Tram - Beatty crossover. If it pulls traffic off I-26, that will increase traffic on Jamil, Tram, and in Whitehall.

- most residents on Tram back out of their driveways into the road. This will become more hazardous.
- our driveway backs into a blind curve with 2 other roads intersecting there - Tudor + S. Stonehedge. An already hazardous point will become impossible with added traffic.
- a good part of our traffic is residents traveling Tram → Jamil → Bower Bend → Harrison area. The "hill" on Jamil before Tram creates a difficult intersection already. With an increase in traffic, there will be quite a backup to get onto Jamil with a left turn. This is our back door into Harrison and pressure will increase on other routes to

- (continued) Hazardous if this route becomes more difficult.
- as Tram becomes more of a main thoroughfare, our property values will decrease. People don't want to buy on a busy road.
- while the Tram end of the crossover is being constructed traffic will be greatly impeded on that whole end of the neighborhood
- there are many walkers, runners, and school children who use Tram - they will be endangered.
- we enjoy the wildlife in this area. The geese, in particular, are not responsive to traffic but we accommodate them. I don't believe future travelers will be so caring.
- residents of Cottages of Whitehall will have great difficulty exiting their neighborhood
- if eventually, due to all these pressures, Tram needs to be straightened or widened, this becomes a financial burden in depreciation of our homes. Many of us, having lived here a long time, ('82 in our case) are relying on home sales for supporting our final care.

COMMENTS

I greatly appreciate the directional flexibility that has been maintained in Rt 1, despite the loss of the Bush River, I-26 interchange. I'm glad to see the interchange go because it can be dangerous. On another topic, I hope that generous use of street lighting will be considered. I believe that street lighting will greatly improve nighttime safety, especially for such a complicated interchange.

COMMENTS Need to have FBI teach Project Managers how to see/find

theft. As a tax payer, SCDOT has no credibility in my book

because of theft, under the table payments, the "good ole boy system,

etc. It's SCDOT's DUTY to see that my tax money is spent

correctly!

COMMENTS

Malfunction junction was a big disaster! Project for
Tram Rd. would be worse than malfunction. Why would
you want to construct a bridge that would destroy Whitehall?
This project has no benefit for Whitehall and would bring
not only traffic along our narrow streets, but crime,
which not enough law enforcement now. I have lived on
Tram Rd. 40 years and I see accidents everyday, who are
cut thru to St Andrews Rd, not residences, who live in
neighborhood, again NO law enforcement to control. We
ask you to cancel this billion dollar project and fix the
roads, which are a disaster. This project is not for
our beautiful neighborhood, for a few engineers of
Department of Transportation to destroy. Would you want
this for your neighborhood?
