Phase 3C Paves Way for Future Phases

Preparation is key for any highway project, especially one as substantial and complex as Carolina Crossroads. Preparation keeps construction on track, places each step in the right order, and helps keep traffic moving safely. With that approach in mind, Phase 3C is all about setting the stage for impactful work and progress in phases still to come.

To prepare the public for Phase 3C, the Carolina Crossroads project team held a public meeting in February. Members of the community viewed displays and maps that showed what to expect during Phase 3C construction and how the I-20 corridor between US 378 (Exit 61) and Bush River Road (Exit 63) will look once the work is complete.

Key Takeaways for Phase 3C

Major goals of Phase 3C include:

- Replacement of the I-20 bridges over the Saluda River and the CSX railroad.
- Building a new noise wall along I-20 Eastbound.
- Adding pavement to prepare for future lanes.

Phase 3C will use a staged construction plan to keep traffic moving. Traffic patterns will be maintained in the first stage while pavement width is being added and partial bridge construction is performed on the outside of I-20. During the second phase, I-20 traffic will be shifted to the outside on the newly widened pavement and bridges to allow for construction in the median and completion of the new bridges.

Phase 3C is in construction and expected to be completed in 2029.

To view the handout and displays from the public information meeting, please visit the Carolina Crossroads Phase 3C Virtual Meeting at www.scdotcarolinacrossroads.com/phase3Cmeeting/.

What's next for the Carolina Crossroads Project?

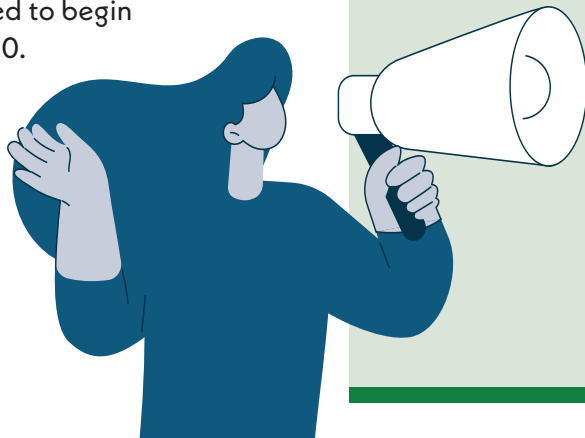

SUBJECT TO CHANGE

- INTERCHANGE IMPROVEMENTS
- INTERCHANGE RELOCATED
- OTHER INTERCHANGES

The project continues to move forward:

- **Phases 1 and 2** are substantially complete.
- **Phase 3B** is nearing completion.
- **Phase 3C** is currently under construction.
- **Phases 3A and 4/5** are expected to begin construction in 2027. Major design and utility coordination activities are ongoing.
- Procurement for **Phase 3D** is planned to begin in mid 2026.
- **Phase 3E** is expected to begin construction in 2030.
